

Privacy Policy

Daily Expense Tracker · Effective 3 September 2026

In short: Daily Expense Tracker helps you manage cash in, cash out, budgets, accounts, bills and savings goals. We use your information only to provide and improve these functions and do not sell your personal data.

1. Who we are

This Privacy Policy applies to the **Daily Expense Tracker** Android application, developed and published by Bharat Bhushan ("we", "us" or "our"). By using the app, you acknowledge the practices described below.

2. Information the app may process

- **Account information:** If you register or sign in, the app may process your email address, authentication identifier and related account details through Firebase Authentication.
- **Financial records entered by you:** Cash-in, cash-out, amount, date, category, item, payment mode, account, vendor, bill number, notes, budgets, savings goals and internal transfers.
- **Files you choose:** Bill photographs, camera images, gallery files or PDFs that you voluntarily attach to an entry.
- **App and device information:** Basic technical information may be processed by service providers for security, authentication, diagnostics and reliable operation.

The app does not require you to enter bank login credentials, card PINs, CVV numbers or online-banking passwords. Please do not store such sensitive credentials in notes or attachments.

3. Guest mode and storage

If you continue without login, your records are kept locally on that device unless you deliberately export, back up or share them. Local data may be lost if the app is uninstalled, app storage is cleared, or the device is damaged without a backup.

When you sign in or use backup/sync features, relevant information may be transmitted to the configured cloud service so that the requested feature can work.

4. How information is used

- To save, organize, edit and display your transactions and bills.
- To calculate balances, budgets, trends, histories and reports.
- To provide account access, backup, restore and synchronization where enabled.
- To support quick-entry notifications and user-requested exports or sharing.
- To maintain security, diagnose errors and improve reliability.

5. Permissions

The app may request camera, photo/file access and notification permissions. These are used only for features you choose, such as attaching a bill or showing quick-entry reminders. You can manage permissions at any time in Android Settings, although disabling one may prevent the related feature from working.

6. Sharing and service providers

We do not sell or rent personal data. Information may be processed by trusted service providers, including Google Firebase services, solely to provide authentication, cloud functionality, security or diagnostics. Information may also be disclosed when legally required or to protect users, the app or the public.

When you use Android's share function to send a report, backup or shopping list, the selected third-party app receives that content under its own privacy policy.

7. Data retention and deletion

Local records remain on your device until you delete them, clear app data or uninstall the app. Cloud or account-linked information is retained only as needed to provide the

service, meet legal obligations, resolve disputes and protect security. You may delete individual records inside the app. To request deletion of account-linked data, contact us at the address below and identify the account concerned.

8. Security

We use reasonable technical and organizational safeguards, but no device, network or storage system can be guaranteed completely secure. Protect your device lock, account password, backups and exported files.

9. Children's privacy

The app is a general financial-record tool and is not directed to children under 13. We do not knowingly seek personal information from children. A parent or guardian may contact us if they believe a child has provided personal information.

10. International use

Cloud service providers may process information in countries other than your own, subject to their safeguards and applicable law.

11. Changes to this policy

We may update this policy when the app, legal requirements or service providers change. The revised effective date will be shown at the top of this page.
